

VISHRUTH ADITHYA J

Senior Data Analyst

7695889146 | vishruthadithya009@gmail.com | Arcot, Tamil Nadu 632503

PROFESSIONAL SUMMARY

Senior Data Analyst with 4.5+ years of experience building BI solutions and supporting data engineering workflows across enterprise analytics environments such as pharma, healthcare, insurance, retail, and supply chain. Skilled in Power BI, SQL, DAX, PySpark, Azure Data Factory, and Databricks. Proven ability to translate complex business requirements into scalable analytics frameworks, automate reporting workflows, and deliver measurable improvements in reporting accuracy, efficiency, and decision-making. Microsoft PL-300 certified.

EXPERIENCE

Senior Analyst | LatentView Analytics

Nov 2025 – Apr 2026

- Contributed to BrickShift, an enterprise initiative to migrate Azure Analysis Services semantic models to Databricks Metric Views, covering sales, finance, and supply chain KPIs.
- Translated legacy DAX business logic into scalable Databricks SQL CTEs and Metric View YAML definitions across 40+ measure patterns.
- Designed and executed an automated metric validation pipeline using Power BI REST API and Databricks notebooks, comparing AAS outputs against Databricks results at total and year-month grains.
- Validated 10 critical DAX measures including revenue, gross margin, budget attainment, quota attainment, and return rate — ensuring business meaning and result consistency post-migration.
- Identified high-risk calculation patterns, type mismatches, and metric discrepancies early in the migration cycle, enabling faster resolution and stronger stakeholder confidence.
- Supported generation of structured migration and validation reports for stakeholder review, providing clear visibility into conversion status, confidence scores, and exception handling.

Senior Power BI Developer | Tek Systems

Nov 2024 – Jun 2025

- Collaborated with business stakeholders to gather reporting requirements and translated them into interactive Power BI dashboards providing actionable insights for business leaders.
- Built and optimized data models with relationships, calculated measures, and KPIs using DAX and Power Query.
- Developed SQL queries, stored procedures, and views to extract, clean, and transform data from multiple sources.
- Automated ETL workflows and data refreshes using Power Automate and SSIS to improve reporting efficiency.
- Implemented Row-Level Security (RLS) for secure, role-based access across supply chain and retail reporting.
- Built interactive Power BI dashboards tracking 5 oncology brands (Tagrisso, Imfinzi, Enhertu, Lynparza, Calquence) across IQVIA, IPSOS, and Cerner Enviza data sources, with SQL ETL on Amazon Redshift and RLS for country-level access.
- Enhanced reporting efficiency by 15%, reducing manual intervention in cross-country brand performance reviews.

Data Analyst | Zetaion System Private Limited

Mar 2021 – Nov 2024

- Partnered with global marketing and commercial stakeholders to design and deliver interactive Power BI dashboards for brand performance tracking across pharma, healthcare, and insurance domains.
- Designed and implemented end-to-end data models, transforming large and complex datasets into structured formats for accurate and scalable reporting.
- Automated recurring reporting processes using Power BI Service, Power Automate, and SQL, reducing manual effort by 30%.
- Developed and enforced Row-Level Security (RLS) and governance controls to meet compliance and data privacy regulations across regions.
- Delivered actionable insights that improved brand strategy, sales forecasting, and operational reporting efficiency with measurable impact on decision-making.

KEY PROJECTS

Healthcare Claims Analysis — *Health Insurance Provider*

- Designed Power BI dashboards for fraud detection, claim anomaly tracking, and processing efficiency; wrote optimized SQL and automated validation checks on large claims datasets.
- Reduced claims processing time by 20%, improving both accuracy and operational efficiency.

Supply Chain & Logistics Analytics — *Global Logistics Company*

- Built Power BI dashboards integrating SQL Server, Excel, and third-party logistics data with DAX measures tracking shipment delays, carrier performance, and route efficiency.
- Reduced average delivery delays by 12% and improved cost efficiency by 8%.

Marketing Campaign Analytics — *Insurance Brand*

- Developed Power BI dashboards with SQL-based RLS for region-specific campaign ROI tracking, integrating multi-channel data to analyze lead conversion rates.
- Improved campaign efficiency by 15% and boosted ROI visibility across regional sales teams.

Retail Transformation Project — *Leading Pharma Company*

- Delivered end-to-end Power BI reporting integrating SQL and Excel, with SSIS automation for unified reporting across retail sales, customer engagement, and product performance KPIs.
- Supported a 10% reduction in reporting delays and improved stakeholder accessibility.

SKILLS

BI & Visualization: Power BI Desktop & Service, DAX, Power Query, Dashboard Design, Row-Level Security

Data Engineering: Azure Data Factory (ADF), Databricks, PySpark, SSIS, SASS

Languages & Databases: SQL (Advanced), Python, Spark SQL, T-SQL, Stored Procedures, Views

Analytics Platforms: Databricks Metric Views, XMLE Endpoint, Power BI REST API, Amazon Redshift

Domains: Pharma/Oncology, Healthcare, Insurance, Retail, Supply Chain, Marketing Analytics

Business Skills: Stakeholder Engagement, KPI Design, Requirements Gathering, Cross-functional Collaboration, Migration Validation

CERTIFICATION

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

EDUCATION

Bachelor of Commerce | Adhiparasakthi College of Arts | 2018
